Swinging Speed Gates

The EasyGate SG/SR slimline cabinet offers a compact design with high security and an attractive look. Available in a 1400 mm cabinet for extra security, these turnstiles are ideal for leisure settings (like fitness and wellness) as well as prestigious environments.

Options and Accessories:

- RFID reader bracket
- Access/ Lane light
- WAV player
- Outdoor package
- Wing light / Hinge cap
- USB/Ethernet converter
- EasyTouch / T-MON software
- Emergency power backup
- Custom finishes
- Ramp LT

Tripod Turnstiles

The BAR turnstile has a smooth motor that adjusts to users' speed and blocks unauthorized access. The BAR ONE is compact, uses a reliable magnetic motor, and works better than regular tripods. All tripod turnstiles allow two-way access and can be upgraded with extras like sensors and emergency arms.

Options and Accessories:

- Access light with reader
- Go Call (passage confirmation)
- Emergency drop arm
- Climb/crawl sensors
- Remote control
- Ramp LT (bases)
- Alternative materials

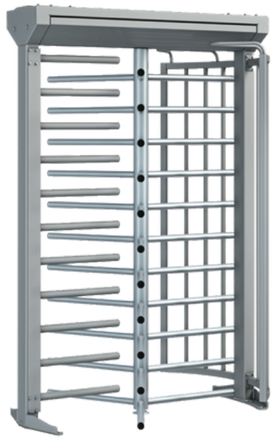
Swing Gate

The HSB-E02 is an indoor security gate with clear swing doors and a stainless steel frame. It lets one person through at a time and has safety sensors for smooth and safe use. The doors open both ways with low-energy motors and move freely if the power goes out. It runs on standard electricity and is only for indoor use.

Tripod Gate

The TPB-E02 is a turnstile made of strong stainless steel with a clean, open design. It can work manually or with power assist. The control system is built in, and it uses standard power (110–230V). It's easy to install on finished floors and can be used outdoors. The unit is safe and protected against dust and light water spray.



Full Height Turnstile

The FTS-E02 is a tall, secure turnstile for indoor or outdoor use. It has strong steel arms that turn to let one person through at a time. It works manually or with power assist and has a built-in control system. It runs on regular power and is safe, durable, and weather-resistant.
